The following is an examiner's statement of reasons for allowance: the claimed invention is directed to an artificial knee joint wherein two offset contact surfaces are arranged such that at every flexion angle, the normals to the contact surfaces always meet at a common intersection point. Neither of the cited references disclose or suggest contact surface design which provides for normals at contact points on a contact surface to share a single common intersection point throughout a range of flexion angles.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
